CAUTIONS

- Aramis plastic sabre and mask can be used by people with over 6 years age.
- When fencing with Aramis plastic sabre you must dress the mask, a tracksuit with **a proper protection jacket** , a glove and a parabrast (for the women).
- The Aramis plastic mask must be used with the Aramis plastic sabre. The Company producer of Aramis product do not take the responsibility for damages caused to the people when the Aramis mask is used with a fencing tool different than the Aramis plastic sabre and when Aramis sabre is used without the Aramis plastic mask and the **proper protection jacket**.
- During fencing exercises do not take out the mask and the **proper protection jacket**.
- We suggest not to make Fencing with plastic sabre on metallic piste, since in this case the reliability of rubber tip cover-button could be very poor.
- The ARAMIS plastic sabre is for amateur youth fencing practice so its strength and reliability has been designed only for this use.
- Do not address the plastic sabre against who does not dress the mask.
- During exercises break or transfers the tip cover-button of the sabre must be addressed versus down.
- During fencing never address the shoulders against the partner.
- The plastic sabre has not to be bent and has not be placed at very high or very low temperatures.
- The plastic sabre tip has not be knocked against the floor.
- The hits have not to be given with violence.
- Fighting man to man and fencing actions very closer are forbidden .
- The plastic sabre has been done for the use for amateur, youth fencing practice , so its reliability has been designed for those uses
