

INSTRUCTIONS/CAUTIONS FOR LIGHT /acoustic FOIL - cod NASYSP09.1

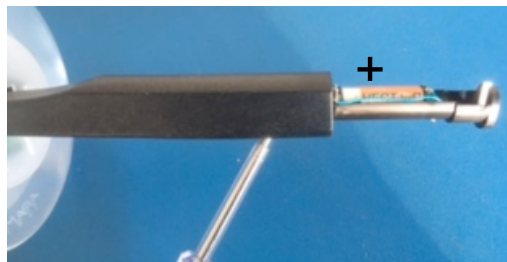

This plastic foil has a special switch on the point and is used as stand alone weapon as epee mode.

To use it the ON/OFF switch must be placed in ON position: at this time a sound signal will be activated as test. If you do not listen any sound the foil could be not OK.

The foil is available with red or green guard light with 2 different sounds one for each light colour for a better scoring identification.

The standby current is zero. Anyway when the foil is not used, is better to place the ON/OFF switch in OFF position.

The weapon NASYSP09.1 has n 1 alkaline battery 12 Vdc 53mAh placed in the handle of foil

-In order to insert or replace the battery in the foil handle extract the holding battery using a small screwdriver as in the picture above, placing attention to the polarity (+ and – poles).
